

The logo features the word "DemandWorks" in white text on a red rectangular background. To its right, the word "Smoothie" is written in a large, blue, stylized font with a white outline and a red swoosh underneath. A registered trademark symbol (®) is located to the upper right of "Smoothie".

DemandWorks

Demand and Supply Planning for Microsoft Dynamics

There is a world class solution for planning and forecasting that's already integrated with your Dynamics AX, NAV, or GP ERP system. It's called Smoothie®.

Smoothie, by Demand Works, is used by hundreds of the best manufacturers and distributors around the globe for forecasting, demand planning, inventory optimization and planning, and S&OP. It's available in server and cloud editions, and all Smoothie solutions include powerful Pivot Forecasting® technology that enables accurate, highly interactive collaborative planning in units, currencies or any unit of measure, and at any product, channel or geographic granularity. Smoothie is a particularly excellent solution for companies that use Dynamics because Demand Works offers a Connector for Dynamics that enables rapid, risk-free, bi-directional integration with your chosen ERP platform.

Smoothie is available for forecasting and collaborative demand planning only, or you can add supply planning for inventory and safety stock optimization, replenishment and master planning. Smoothie's supply planning features revolutionary Pivot Planning® that lets you classify and modify groups of items or locations and immediately see the effects on projected inventories, in units or currency.

The Demand Works Connector for Dynamics supports both supply and demand planning, integrating data such as shipments, forecasts, orders, inventories, item and customer master data, inventory policies and bills of material. It's currently supported with Dynamics AX, NAV, and GP.
