

## Smoothie® Product Comparison

|                               |                                                                   | Smoothie Desktop | Smoothie Server | Cloud Smoothie |
|-------------------------------|-------------------------------------------------------------------|------------------|-----------------|----------------|
| <b>Forecasting</b>            | Automated statistical forecasting "expert"                        | Yes              | Yes             | Yes            |
|                               | Numerous advanced and optimized time-series methods               | Yes              | Yes             | Yes            |
|                               | Seasonal forecasting and profiling                                | Yes              | Yes             | Yes            |
|                               | Outlier detection and correction                                  | Yes              | Yes             | Yes            |
|                               | Promotions                                                        | Yes              | Yes             | Yes            |
|                               | Pivot Forecasting®                                                | Yes              | Yes             | Yes            |
|                               | Forecasting in monthly, weekly, or daily time series              | Yes              | Yes             | Yes            |
|                               | Specialized features for new products                             | Yes              | Yes             | Yes            |
| <b>Demand Planning</b>        | Forecast retention for plan and performance analysis              | Yes              | Yes             | Yes            |
|                               | Plan by customer, channel, product                                | Yes              | Yes             | Yes            |
|                               | Time-phased price, cost and margin conversions                    | Yes              | Yes             | Yes            |
|                               | Budget retention and comparisons                                  | Yes              | Yes             | Yes            |
|                               | Portfolio analysis                                                | Yes              | Yes             | Yes            |
|                               | Pivot Maps®                                                       | Yes              | Yes             | Yes            |
|                               | Item supersession                                                 | Yes              | Yes             | Yes            |
|                               | New item/customer attribute management                            | Yes              | Yes             | Yes            |
| <b>Collaboration</b>          | Incorporation of POS and other reference information              | Yes              | Yes             | Yes            |
|                               | Web-based collaboration                                           |                  | Yes             | Yes            |
|                               | Spreadsheet-based collaboration                                   |                  | Optional        | Optional       |
| <b>Inventory Optimization</b> | Transaction logging and role-based adjustment permissions         |                  | Yes             | Yes            |
|                               | Safety stock simulations                                          |                  | Optional        | Optional       |
|                               | Multi-tier inventory optimization                                 |                  | Optional        | Optional       |
|                               | Calculated safety stocks based on rules, fitted stats, or actuals |                  | Optional        | Optional       |
|                               | Plan visualization in units or cost                               |                  | Yes             | Yes            |
|                               | Item segmentation & classification                                |                  | Optional        | Optional       |
|                               | Global inventory visibility                                       |                  | Optional        | Optional       |
| <b>Supply Planning</b>        | Turnover analysis                                                 |                  | Optional        | Optional       |
|                               | MRP                                                               |                  | Optional        | Optional       |
|                               | DRP (hub and spoke)                                               |                  | Optional        | Optional       |
|                               | Exception management                                              |                  | Optional        | Optional       |
|                               | Alternative supply strategies                                     |                  | Optional        | Optional       |
|                               | Time-phased replenishment/requirements planning                   |                  | Optional        | Optional       |
|                               | Strategic inventory (for production leveling)                     |                  | Optional        | Optional       |
|                               | Multi-item order/vehicle batching                                 |                  | Optional        | Optional       |
| <b>Capacity Planning</b>      | Planning in daily, weekly, or monthly time periods                |                  | Yes             | Yes            |
|                               | Formulations                                                      |                  | Optional        | Optional       |
|                               | Bill of Resources                                                 |                  | Optional        | Optional       |
|                               | Time-phased resource assignments                                  |                  | Optional        | Optional       |
| <b>Technology</b>             | Variable capacity                                                 |                  | Optional        | Optional       |
|                               | Finite capacity planning optimization                             |                  | Optional        | Optional       |
|                               | Extensible with custom attributes, measures, and formulas         |                  | Yes             | Yes            |
|                               | Easily deployed web technology                                    |                  | Yes             | Yes            |
|                               | Integration & process automation                                  |                  | Yes             | Yes            |
|                               | Connectors for leading ERP systems                                |                  | Yes             | Yes            |
|                               | Web services integration                                          |                  |                 | Yes            |
| <b>Reporting</b>              | AD, SAML and Azure Active Directory SSO                           |                  | Yes             | Yes            |
|                               | CPU & memory configuration optimizations                          |                  | Yes             | Yes            |
|                               | Excel, CSV and database reporting                                 | Yes              | Yes             | Yes            |
|                               | Flexible, pre-built report templates                              |                  | Yes             | Yes            |
|                               | Scheduled exports/reports                                         |                  | Yes             | Yes            |
